

2010 Interdisciplinary Contest in Modeling Press Release—April 1, 2010

COMAP is pleased to announce the results of the 12th annual Interdisciplinary Contest in Modeling (ICM). This year 356 teams representing institutions from four countries participated in the contest. Four teams were designated as OUTSTANDING WINNERS:

Carroll College, Helena, MT (INFORMS Prize)
Beijing Jiaotong University, Beijing, China
Hangzhou Dianzi University, Hangzhou, China
Lawrence University, Appleton, WI

This year's contest ran from Thursday, February 18 to Monday, February 22, 2010. During that time, teams of three students researched, analyzed, modeled, and communicated a solution to an open-ended interdisciplinary modeling problem. The 2010 ICM was primarily an online contest, where teams registered, obtained contest materials, and downloaded the problem statement and data at the prescribed time through COMAP's ICM Website.

This year's environmental sciences problem was extremely complex and challenging. It required teams to make decisions on challenges in areas of physical oceanography, marine ecology, and environmental modeling. Teams were required to build effective models to confront these challenging issues and understand the complexity of pollution in the oceans. The problem contained many complex and multifaceted issues to be analyzed and had several challenging requirements calling for innovative scientific and mathematical modeling and analysis.

This problem also had the ever-present ICM requirements to use data analysis and creativity along with effective communication. The author of the problem was Miriam Goldstein, Scripps Institute of Oceanography, CA, and the problem originated from her own professional research.

The Four Outstanding solution papers will be published in *The UMAP Journal*, along with commentaries from the problem author and judges. All the members of the 356 competing teams are to be congratulated for their excellent work and enthusiasm for scientific and mathematical modeling and interdisciplinary problem solving. This year's judges remarked that despite the challenging problem with myriad difficult tasks, the quality of the modeling, analysis, and presentation was high.

2010 ICM Statistics

- 356 teams participated
- 23 U.S. Teams (6%)
- 333 Foreign Teams (94%) from Indonesia, China and Malaysia
- 4 Outstanding Winners (1%)
- 6 Finalists (2%)
- 45 Meritorious Winners (13%)
- 120 Honorable Mentions (33%)
- 181 Successful Participants (51%)

ICM is associated with COMAP's Mathematical Contest in Modeling (MCM), which is held during the same weekend. ICM is designed to develop and advance interdisciplinary problem-solving skills in science, technology, engineering, mathematics (STEM), as well as competence in written communication. The first four interdisciplinary problems involved concepts from environmental science, biology, chemistry, and/or resource management. The next three ICM problems involved operations research, information science, environmental science, and interdisciplinary issues in security and safety. The next three contest problems involved public health. This year's problem returned to the environmental area. Each team is expected to include advisors and team members who represent a range of disciplinary interests in applied problem solving and modeling.

To obtain additional information about the ICM and to obtain a complete listing of all team designations, please visit the ICM Website at: www.mcmcontest.com, or contact COMAP at: mcm@comap.com

Major start-up funding for the ICM was provided by a grant from the National Science Foundation (through Project INTERMATH) and COMAP. Additional support is provided by The Institute for Operations Research and the Management Sciences (INFORMS) and IBM. COMAP's Mathematical Contest in Modeling and Interdisciplinary Contest in Modeling are unique among modeling competitions in that they are the only international contests in which students work in teams to find a solution. Centering its educational philosophy on mathematical modeling, COMAP uses mathematical tools to explore real-world problems. It serves the educational community as well as the world of work by preparing students to become better informed—and prepared—citizens, consumers, workers, and community leaders.

Major funding provided by
The National Science Foundation

Administered by
The Consortium for Mathematics
and Its Applications

Contest Directors

Chris Arney, *U. S. Army Research Office, NC*
Joseph Myers, *United States Military Academy, NY*

Executive Director

Solomon A. Garfunkel, *COMAP, Inc., MA*

Associate Director

Rod Sturdivant, *United States Military Academy, NY*
